TECHNICAL SKILLS

AI/ML: AI Agents Building ,Machine Learning, Predictive Modelling, LLMs, Model Training & Deployment, Data Preprocessing, Real-Time AI Systems
Languages: Python, Java, SQL
Frameworks: Pandas, NumPy, TensorFlow, Keras, Flask, FastAPI, Node.js, Express.js, React.js
Databases: MySQL, PostgreSQL (Joins, CTEs, Window Functions), MongoDB
Developer & BI Tools: Git, GitHub, Postman, VS Code, Power BI, Excel, Jupyter, Google Colab
Concepts & Architecture: REST APIs, Agile/Scrum, OOP

EDUCATION

Anil Neerukonda Institute of Technology and Sciences Visakhapatnam, AP
B.Tech in Computer Science & Engineering – Data Science CGPA: **8.53/10.0** 2022 – 2026

INTERNSHIP EXPERIENCE

AI/ML Intern – SmartEye3i (Product-Based Company) 3 Months

- Led AI/ML development for **PathPal**, an assistive technology product enabling real-time navigation and accessibility features for individuals with disabilities.
- Designed, trained, and deployed core predictive models; took full ownership of the AI pipeline from data preprocessing through production deployment.
- Optimized data processing workflows, improving model inference speed and establishing a scalable foundational AI architecture for the live product.
- Collaborated in an Agile environment, delivering iterative model improvements aligned with product milestones and stakeholder feedback.

PROJECTS

ScholarScan AI: Student Eligibility & Course Recommender | *FastAPI, Gemini AI, HTML/CSS/JS* 2026

- Built a B2B/B2C AI assistant automating international student profile screening for UK, Canada, USA, and Australia, generating detailed visa and admission eligibility reports.
- Engineered **dual-mode architecture**: AI Mode via **gemini-2.5-flash** for personalized deep reports; Offline Mock Mode with Python heuristics engine for zero-setup testing.
- Implemented multi-format GPA validation, English proficiency checks, financial feasibility audit, and study gap visa-risk assessment module.
- Designed responsive dark-theme glassmorphism UI with animated progress score ring and dynamic dashboard reports; served via FastAPI + Uvicorn (ASGI).

FarmNet: Smart Farming System | *Python, TensorFlow, Keras, MongoDB, FastAPI, Pandas* 2025

- Engineered a hybrid deep learning crop disease detection model utilizing **ResNet50, DenseNet121, and EfficientNetB5** (achieving **94.89% accuracy**), integrated into a FastAPI backend for real-time inference.
- Designed backend integrating Weather, E-commerce, and Text-to-Speech APIs with structured MongoDB schemas, robust exception handling, and multilingual TTS support.
- Built responsive multilingual UI with dynamic state management; managed full project lifecycle with Git branching and collaborative version control.

RealEstateHub: Full-Stack Property Platform | *MongoDB, Express.js, React.js, Node.js, Google Maps API* May 2025

- Developed a responsive full-stack real estate web platform to efficiently manage property listings and user interactions.
- Implemented comprehensive CRUD operations and integrated the Google Maps API for interactive property location tracking and spatial visualization.

Road Accident Analysis: Data Processing System | *Python, SQL, Power BI, Pandas, NumPy* 2025

- Engineered a data pipeline to ingest and clean **433,000+ accident records** from NCRB/data.gov.in, resolving schema inconsistencies and standardizing data quality at scale.
- Performed EDA to identify high-risk zones, accident patterns, and contributing factors; delivered interactive Power BI and Excel dashboards with actionable safety insights.

ACHIEVEMENTS & ACTIVITIES

Algorithmic Problem Solving: Consistently maintained a daily Data Structures and Algorithms (DSA) streak on **LeetCode** using Java to optimize backend logic.
Technical Publications: Authored and successfully submitted a technical research paper to an online academic platform (April 2026).

CERTIFICATIONS

Large Language Models (LLM) – NPTEL, IIT Madras 2024

INTERESTS

Solo Travel: Independently explored 5 states across India, developing adaptability and cross-cultural communication.
Content Creation: Building good content in travel, tech, and fitness.
